

Create NODE RED Service.

The image displays two screenshots related to creating a Node-RED service on IBM Cloud.

Top Screenshot: Node-RED Interface

The browser window shows the Node-RED web interface at `node-red-qeita-2022-11-10.eu-gb.mybluemix.net/red/#flow/e9aa5f3789889937`. The interface includes a left sidebar with node categories (common, function), a central workspace with a flow titled "Flow 1" containing an "inject" node and a "msg.payload" node, and a right sidebar with an "info" panel and a "Flow 1" panel showing the flow ID "e9aa5f3789889937".

Bottom Screenshot: IBM Cloud Console

The IBM Cloud console shows the details for the "Node RED QEITA 2022-11-10" app. The "Details" section lists the App URL, Source, Resource group, Deployment target, and Created date. The "Services" section shows the "Cloudant" service. The "Deployment Automation" section lists the "pr-pipeline" and "ci-pipeline" with their respective statuses. The "Getting started quickly" section provides instructions for configuring the app.

Details

Property	Value
App URL	https://node-red-qeita-2022-11-10.eu-gb.mybluemix.net
Source	https://eu-gb.git.cloud.ibm.com/512719106010/NodeREDQEITA2022-11-10
Resource group	Default
Deployment target	Node RED QEITA 2022-11-10
Created	11/10/2022

Services

Service	Actions
Cloudant	Open dashboard Documentation API reference

Deployment Automation

Name	Status
pr-pipeline	No stages detected
ci-pipeline	Success

Getting started quickly

Configuring your app

To connect services and DevOps toolchains to your app:

1. Use the **Services** card to connect a service to your app. Select an existing service instance, or create a new one. [Learn more.](#)
2. If you want to view the code before your app is deployed, click **Download code** to obtain the .zip file.
3. Click **Deploy your app** in the **Deployment Automation** card to select the deployment target and configure the Continuous Delivery service. The deployment begins automatically.
4. After the deployment begins, you can view the status of the deployment, modify your app, view your repo, or view the app's URL.
